DETAILED ACTION

1. An Amendment was filed 3/10/05.

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

A. **Claims 31, 33 and 34** are rejected under 35 U.S.C. 103(a) as being unpatentable over Sykora 3819226 in view of Willey 6234554.

Sykora discloses a snowmobile comprising
Chassis, motor, endless track, at least one ski connected to steering mechanism (all inherent),
Turnable support frame (unidentified, inherent) mounted to the steering mechanism,
Windshield 12 comprising a transparent material (inherent), detachably mounted to the support frame via at least one locking structure (figs 4 and 5).

The reference does not disclose the windshield detachably secured via a locking member, and receiver, structure, while Willey shows this configuration with

Locking members each having shaft 22 connected at an end to the vehicle (fig 1), and enlarged end 52,

Receiving structure 32 associated with the windshield that releasably engages the locking member upon application of force upon the windshield (figs 3, 4),

The structure comprising a deformable, resilient material (c5, ln 36-40) permitting the enlarged end to pass therethrough.

Art Unit: 3611

It would have been obvious to one with ordinary skill in the art at the time the invention was made to include this arrangement, as shown in Willey, to facilitate replacement of the windshield in a simple, yet secure manner, thus decreasing costs and effort, and increasing convenience and safety.

B. **Claims 35 and 36 are** rejected under 35 U.S.C. 103(a) as being unpatentable over Sykora in view of Willey, and in further view of Gagne 6752447.

The previous references do not disclose hand-protecting members attached to sides of the windshield/steering mechanism, while Gagne shows these elements 60. It would have been obvious to one with ordinary skill in the art at the time the invention was made to include this components, as shown in Gagne, to protect the user's hands from environmental and travel conditions, thus increase safety and comfort.

3. ALLOWABLE SUBJECT MATTER

a. **Claims 1, 5-9, 23-26 are allowable.**

b. **Claim 32** is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Prior art does not disclose a snowmobile described above further comprising, *inter alia*, the enlarged portion of the locking member as passing through the receiving structure.

4. The prior art considered pertinent to the disclosure, but not relied upon, include(s): Takemura et al 6543831.

Art Unit: 3611

5. RESPONSE TO REMARKS

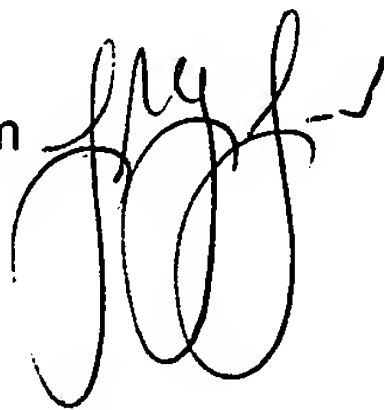

Upon reconsideration, Examiner has provided new rejections for several claims, and *sincerely apologizes* for the inconvenience. Allowable subject matter still remains.

6. Communication with the Examiner and USPTO
